

Sai Vomanesh Chekuri

Performance Marketing Specialist | Client Solutions | Measurement & Optimization

saivomaneshchekuri@gmail.com • 716-495-2485 • <https://www.linkedin.com/in/sai-vomanesh-chekuri/>

Education

University at Buffalo, SUNY

Aug 2023 - Feb 2025

Master of Science in Industrial Engineering (Data Analytics & Management)

Skills

Paid Social Strategy, Performance Marketing, TikTok Advertising Platforms, DTC Growth Marketing, Customer Acquisition, Campaign Execution & Optimization, Audience Strategy & Targeting, Budget Allocation & Bid Optimization, Creative Testing & A/B Experimentation, Attribution Analytics, Conversion Tracking, Customer Journey Analysis, CTR / CPC / CPA / ROAS Analysis, Performance Reporting & KPI Tracking, Excel, SQL, Cross-Functional Collaboration, Stakeholder Communication, AI-Assisted PPC Optimization, Paid Social Analytics, SEO Fundamentals

Internship & Certifications

Six Sigma Green Belt, Process Improvement, Root Cause Analysis, Data-Driven Optimization

Paper Presentation, "Detection and Classification of Leukemia using AI" at RAEEUCCI-2023, IEEE-sponsored

Experience

Technical Product Specialist – TikTok For Business

Atento – Miami, Florida

Paid Social, Performance Marketing & Campaign Analytics

Mar 2025 – Present

- Managed and supported 30+ SMB, enterprise, and DTC advertiser accounts across Financial Services, Apps, Telecom, Automotive, and E-commerce, contributing to revenue-influencing outcomes across an estimated \$5M+ advertiser portfolio through data-driven campaign optimization, measurement guidance, and performance insights.
- Analyzed campaign funnels, attribution signals, ROAS, CPA, CPC, CTR, conversion rate, pacing, delivery health, audience performance, system bidding, delivery trends, and model prediction behavior to identify growth opportunities, improve media efficiency, and support budget, targeting, and activation recommendations.
- Reviewed historical campaign performance, interpreted A/B testing outcomes, significance results, and treatment-control patterns across creative assets, audience segments, targeting strategies, and bidding approaches, translating measurement findings into actionable insights for advertisers and internal stakeholders.
- Identified tracking gaps, missing signals, attribution inconsistencies, and data-quality issues across Pixel, Events, API, Attribution, Commerce, and Measurement solutions, partnering with Product, Engineering, Sales, and Measurement teams to improve reporting reliability, campaign decision accuracy, and activation readiness.
- Translated complex marketing, attribution, and performance findings into clear reports, dashboards, KPI commentary, and recommendations, helping cross-functional teams evaluate campaign efficacy, improve acquisition strategy, prioritize growth opportunities, and connect analytical outputs to business impact.

Research Assistant, SRM University - Kattankulaturu, Tamilnadu

Nov 2022 – Apr 2023

- Co-authored and presented a paper titled "Detection and Classification of Leukemia using Artificial Intelligence" at the IEEE-sponsored 2nd International Conference on Recent Advances in Electrical, Electronics, Ubiquitous Communication and Computational Intelligence
- Developed a high-accuracy machine learning model (97-99%) from 286 CBC records, effectively distinguishing between leukemia and non-leukemic patients through advanced machine learning
- Designed an intuitive GUI for healthcare professionals to input 15 CBC values (e.g., hemoglobin, WBC count) and receive real-time diagnostic results, enhancing accessibility for non-technical users

Publications

C. S. Vomanesh, M. V. S. Chaitanya, S. Sumanth and R. Arumugam, "Detection and Classification of Leukaemia using Artificial Intelligence," 2023 International Conference on Recent Advances in Electrical, Electronics, Ubiquitous Communication, and Computational Intelligence (RAEEUCCI), Chennai, India, 2023.

Projects

Customer Segmentation & Performance Strategy Project

Business Intelligence, University at Buffalo

- Built customer segmentation models using RFM analysis and clustering techniques to identify high-value, at-risk, and growth segments, enabling more targeted engagement and retention strategies.
- Analyzed behavioral and performance metrics to uncover segment-level patterns, recommend audience-specific messaging and optimization strategies, and improve understanding of customer value and conversion potential.
- Developed dashboards and data-driven reporting to translate complex customer behavior datasets into actionable recommendations aligned with lifecycle strategy, product decision-making, and growth objectives.
