Education

University at Buffalo, SUNY

Aug 2023 - Feb 2025

Master of Science in Industrial Engineering (Data Analytics & Management)

Skills

Paid Media Strategy, Performance Campaign Management, Traditional and Digital Marketing, Customer Journey Analysis, Performance Reporting KPI Tracking, Excel, Brand Measurement and Analytics, Data Visualization Dashboarding, Tracking Measurement Validation, Conversion Tracking (Pixel, Events), Go-to-Market Collaboration, Attribution Analytics, API Data Analysis Troubleshooting, A/B Testing Experimentation, Product Adoption Strategy, Customer Segmentation (RFM, Clustering), Cross-Functional Collaboration, Stakeholder Communication, SQL

Internship & Certifications

Six Sigma Green Belt, Process Improvement, Root Cause Analysis, Data-Driven Optimization

Paper Presentation, "Detection and Classification of Leukemia using AI" at RAEEUCCI-2023, IEEE-sponsored

Experience

Technical Product Specialist – TikTok Advertising Platforms

Atento – Miami, Florida

Performance Marketing & Analytics

Mar 2025 – Present

- Managed and supported 30+ SMB, enterprise, and DTC advertiser accounts across industries including Financial Services, Apps, Telecom, Automotive, and E-commerce, helping improve campaign delivery, client retention, and overall advertising performance through data-driven recommendations and platform expertise.
- Developed strong expertise across TikTok Advertising Platforms including Ads Manager, Business Center, Events Manager, Pixel, Attribution, Commerce, and Measurement solutions, helping advertisers adopt platform capabilities, optimize campaign performance, and better understand advertising measurement and attribution strategies.
- Analyzed and optimized key campaign metrics including CTR, CPA, CPC, ROAS, conversion rate, pacing, delivery health, attribution signals, system bidding, delivery funnel trends, model prediction behavior, and audience performance to identify growth opportunities, improve ad delivery efficiency, and strengthen long-term client outcomes.
- Reviewed historical campaign performance, conducted A/B analysis on creatives and targeting strategies, and translated audience, measurement, and performance insights into actionable recommendations for high-spending clients by identifying missed opportunities, supporting full-funnel growth initiatives, and maintaining high client satisfaction through consultative communication and effective resolution of advertiser concerns.
- Collaborated cross-functionally with Product, Engineering, Sales, Measurement, and Account Management teams to resolve platform, tracking, API, and delivery-related issues while maintaining high client satisfaction through consultative support, de-escalation handling, and actionable performance insights in fast-paced environments.

Research Assistant, SRM University - Kattankulaturu, Tamilnadu

Nov 2022 – Apr 2023

- Co-authored and presented a paper titled "Detection and Classification of Leukemia using Artificial Intelligence" at the IEEE-sponsored 2nd International Conference on Recent Advances in Electrical, Electronics, Ubiquitous Communication and Computational Intelligence
- Developed a high-accuracy machine learning model (97-99%) from 286 CBC records, effectively distinguishing between leukemia and non-leukemic patients through advanced machine learning
- Designed an intuitive GUI for healthcare professionals to input 15 CBC values (e.g., hemoglobin, WBC count) and receive real-time diagnostic results, enhancing accessibility for non-technical users

Publications

C. S. Vomanesh, M. V. S. Chaitanya, S. Sumanth and R. Arumugam, "Detection and Classification of Leukaemia using Artificial Intelligence," 2023 International Conference on Recent Advances in Electrical, Electronics, Ubiquitous Communication, and Computational Intelligence (RAEEUCCI), Chennai, India, 2023.

Projects

Customer Segmentation & Performance Strategy Project

Business Intelligence, University at Buffalo

- Built customer segmentation models using RFM analysis and clustering techniques to identify high-value, at-risk, and growth customer segments, enabling more targeted marketing and retention strategies.
- Analyzed performance metrics and segmentation insights to recommend audience-specific messaging, budget allocation, and optimization strategies that improved engagement and retention outcomes.
- Developed data-driven business insights and performance reporting approaches using customer behavior analysis, translating complex datasets into actionable recommendations aligned with marketing and growth objectives.
